

HANNATH SAJAD

B.Tech. – Computer Science & Engineering

✉ hannasajad@gmail.com | 📞 +91-8921022045 | 🌐 <https://github.com/HannathSajad> | 🔗 <https://www.linkedin.com/in/hannath-sajad-499726296> | 📍 Thiruvananthapuram, Kerala, India.

SUMMARY

Computer Science undergraduate pursuing a B.Tech with Honours in Computational Fundamentals of Machine Learning with hands-on expertise in AI, IoT, and full-stack development. Passionate about building intelligent, data-driven systems, backed by active community leadership and technical event organization.

SKILLS

- **KEY EXPERTISE:** Python, Java, C, AI, Machine Learning, Data Science, Leadership, Communication Skills, Problem Solving, DBMS, Data Structures

EDUCATION

B.Tech. in Computer Science & Engineering | Mar Baselios College of Engineering and Technology (Autonomous)

CGPA: 9.02 / 10 • Sep 2023 – Jan 2027

12th in CBSE | Jyothis Central School, Kazhakootam, Thiruvananthapuram

Percentage: 94 / 100 • Mar 2023

10th in CBSE | Jyothis Central School, Trivandrum

Percentage: 94 / 100 • Mar 2020

PROJECTS

AI-Powered GitHub Dev Assistant

May 2026 – Jun 2026

- Built an AI platform analyzing GitHub commits to automate code refactoring and bug pattern detection.
- Engineered an LLM workflow to detect security vulnerabilities and automatically generate repository pull requests.
- Designed an interactive analytics dashboard for real-time code quality and software delivery tracking.

FPGA-Based Hardware Acceleration System

Jan 2026 – Mar 2026

- Developed an FPGA acceleration system to optimize execution throughput and reduce latency.
- Implemented sequential and parallel processing architectures with precise hardware timing control.
- Integrated performance visualization tools to demonstrate measurable speedups in real-time.

Smart Aquarium Monitoring System

Oct 2025 – Dec 2025

- Engineered an IoT platform using ESP32 and environment sensors for continuous automated monitoring.
- Integrated real-time data pipelines with AWS cloud infrastructure for automated threshold alerts.
- Built a live visualization dashboard enabling real-time analytics and intelligent decision-making.

INTERNSHIPS

Full Stack Development Intern | ICT Academy of Kerala

Dec 2024 – Jan 2025, Thiruvananthapuram, India

- Developed scalable web applications using the MERN stack and built responsive frontend interfaces.
- Implemented backend services with RESTful APIs, user authentication, and database integration.

AI & Solution Design Intern | Intel Unnati Program

May 2024 – Jul 2024, Thiruvananthapuram, India

- Designed AI-driven workflow automation solutions and analyzed large datasets for data-driven insights
- Contributed to model development, system architecture, and technical evaluation under industry mentorship.

CERTIFICATIONS

Deep Learning | NPTEL (IIT Ropar)

INTRODUCTION TO LARGE LANGUAGE MODEL | NPTEL (IIT Madras)

ARTIFICIAL INTELLIGENCE PRIMER CERTIFICATION | Infosys Springboard

From Learner to Builder: Become an AI Agent Architect | IBM SkillsBuild

GenAI Powered Data Analytics Job Simulation (TATA) | TATA

POSITIONS OF RESPONSIBILITY

Co-Lead – Skill Development, Catalyst – Mar Baselios IEDC

Event Organizer – CSI SB MBCET

Student Placement Coordinator – Mar Baselios College of Engineering and Technology

LANGUAGE

English, Malayalam

AWARDS

ADITYA BIRLA CAPITAL SCHOLARSHIP | Aditya Birla Capital

BEST STUDENT DISCIPLINE AWARD | Jyothis Central School

NATIONAL AND STATE LEVEL SIP ABACUS PRODIGY 2ND RUNNER UP | SIP Abacus
